## Enabling Faster Integration of Energous' WattUp Wireless Charging Technology Into Customer Product Designs

The WattUp developer kit for smart glasses provides manufacturers with a robust set of tools and resources to enable faster integration of Energous' WattUp technology into future product designs.

The smart glasses reference design transmitter incorporates the EN4100 and EN3210. The EN4100 is a highly integrated System-on-Chip (SoC) RF transmitter IC, while the EN3210 is a high-power, high-efficiency power amplifier (PA).

On the receiver side, the EN2223 RF-to-DC receiver can be connected to up to four antennas.

### Kit Contents

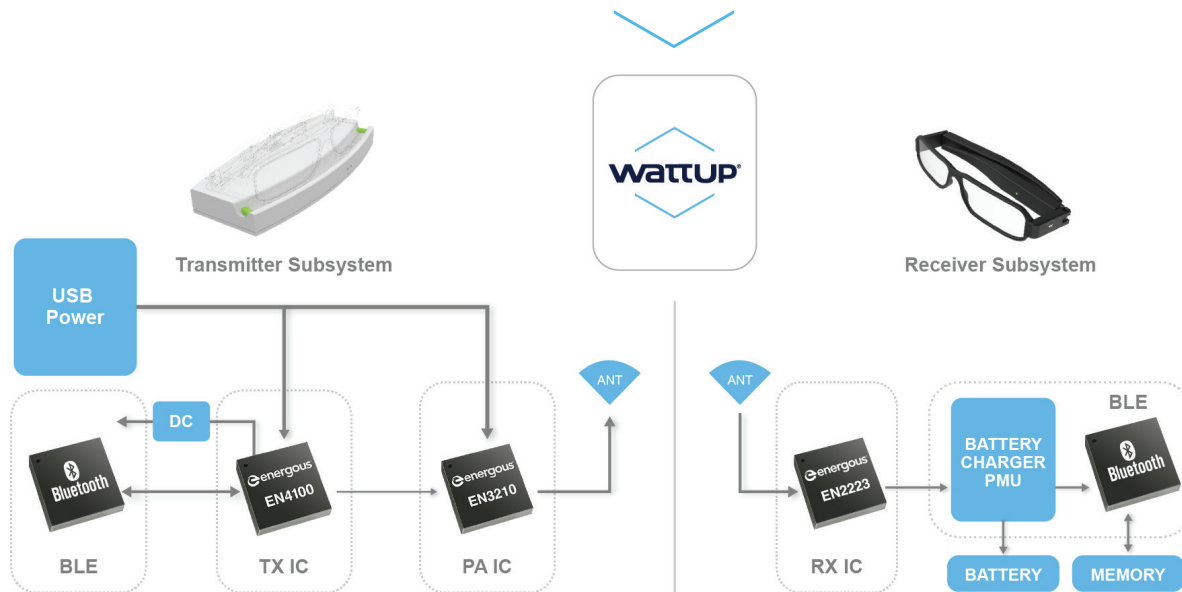

- Reference Design Transmitter Hardware
- Reference Design Receiver Hardware
- Mobile App to monitor and control
- TX/RX Schematics and Layout files
- TX/RX Mechanical files

### Advantages

- Faster product integration
- Easier manufacturing of wirelessly charged products
- Small footprint to accommodate devices with various form factors, including those with curved edges and non-flat surfaces
- WattUp receiver detection

# WattUp Smart Glasses Wireless Charging Developer Kit Block Diagram

## Receiver Board

- Optimized for 80mA battery at 0.5C (20mA), higher-power charging available per use case
- EN2223 RX IC with BLE and supporting circuitry
- Miniature rectifier circuit board design
- Multiple antenna system support
- Fuel gauge and battery protection
- App-based power measurement and control

## Transmitter

- EN3210 Power Amplifier and EN4100 TX Controller
- Split feeds for multiple antennas
- BLE communication
